(54) TIME CORRECTION DEVICE OF TIMEPIECE IN IMAGE SIGNAL RECEPTION DEVICE

(57)Abstract:

PURPOSE: To provide a time correction device for automatically correcting time indicated by a timepiece when receiving an image signal by which time is indicated on the screen of a VTR, a television receiver, a cable television receiver, etc., having a built-in timepiece.

CONSTITUTION: A time correction device is provided with a means 5 for detecting a time indicating image signal superimposed on an image signal being received and for extracting this time indicating image signal detected and a means 6 for recognizing time indicated by the time indicating image signal extracted. The device is further provided with a means 7 for originating time data indicating this recognized time and a means 8 for correcting according to the originated time data the time indicated by a built-in timepiece 3.

LEGAL STATUS

[Date of request for examination] 14.12.1994

[Date of sending the examiner's decision of rejection] 21.10.1997

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
